

ACTIVITY 1: ORGANIC FARMING QUESTIONS

Using both the information on the previous slides and the Britannica website on organic farming
<https://www.britannica.com/topic/organic-farming>.

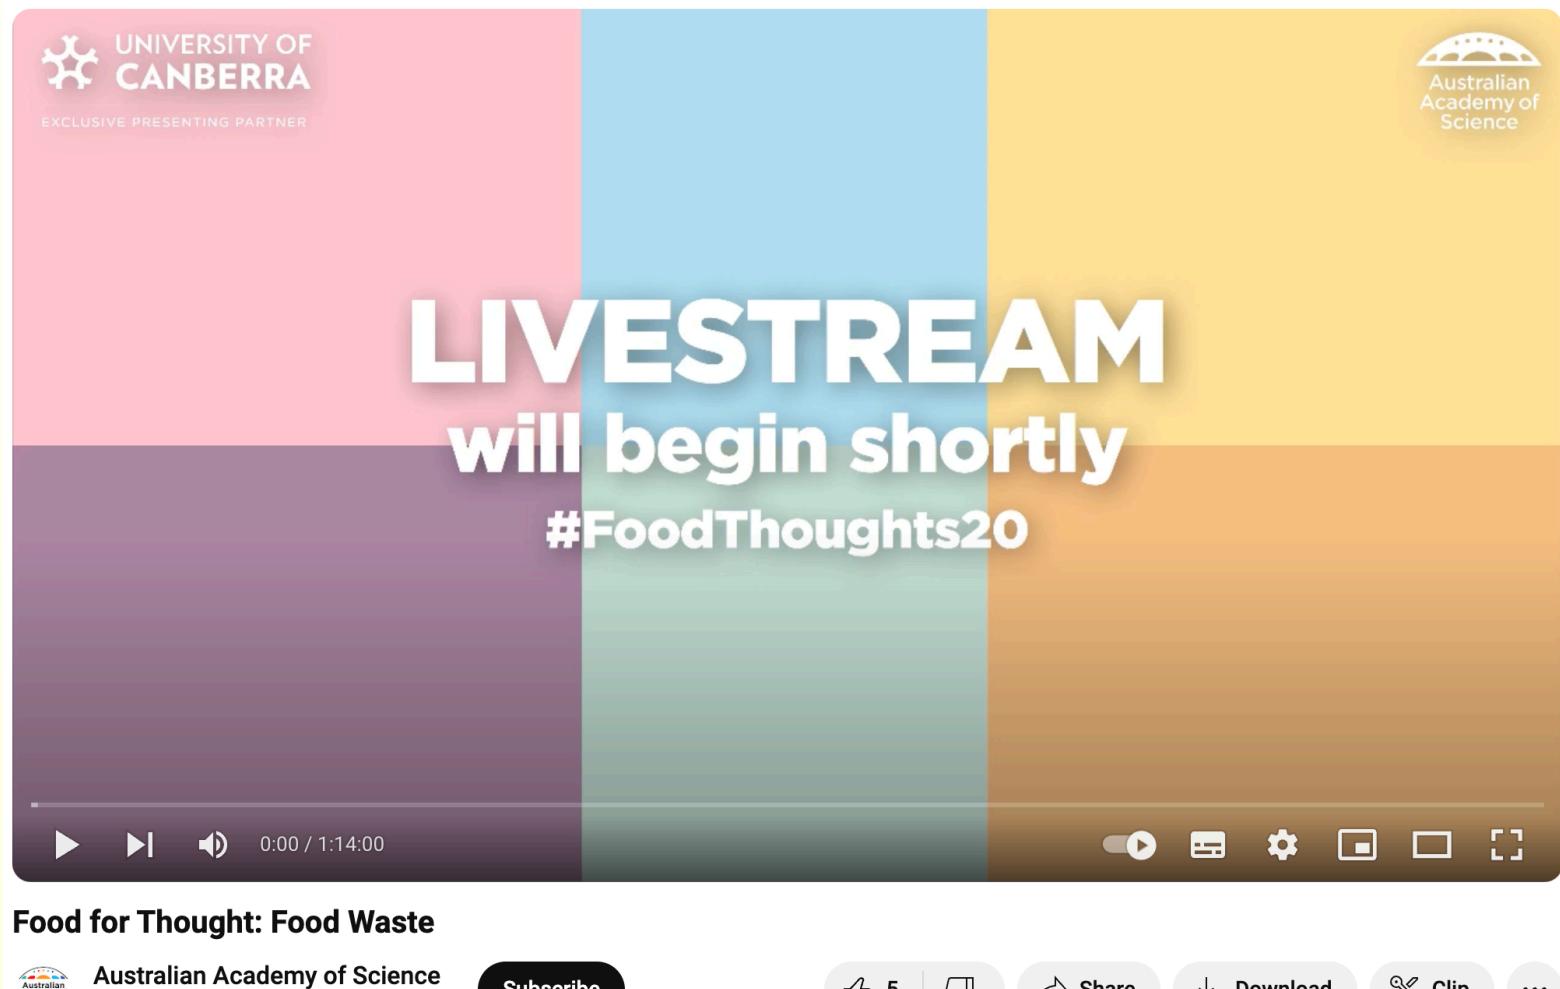

Answer these 5 questions:

1. What is organic farming, and what are its key principles that differentiate it from conventional farming?
2. What are some environmental benefits of organic farming, and how do they contribute to sustainability?
3. Identify two challenges faced by organic farmers. How might these challenges impact food production?
4. What are some of the regulations or standards that organic farms must follow to be certified as organic?
5. How does consumer demand for organic products influence farming practices and agricultural policies, according to the article?

ACTIVITY 2: SPOT THE DIFFERENCE

Food	Sample A (organic or non organic)	Sample B (organic or non organic)	Comments on taste, texture, smell and appearance.

ACTIVITY 3: FOOD FOR THOUGHT: FOOD WASTE

Food for thought: Food waste
